## 1. Abstract

In this study, we examined the linear configuration of extraterrestrial high-speed visible radiation emitting objects using advanced real ophthalmological techniques. Animated artefacts visual transcribed on the para-atmosphere canvas demonstrated that the novel approach could be a low-cost and highly sustainable alternative for telescopes. However, continued use of the technique provoked involuntary discharge of ophthalmological fluids linked with stress and strain suggesting the extra-terrestrial transferred invisible energy that could be harnessed for sustainable development.

## 2. Introduction

Humans gaze of terrestrial objects should not be monetized or reduced to an object of profiteering and gubernatorial procedural redundancies [1]. Such cash cow grab vaccination could minimize the production of folic acid in olfactorial appendicular skeletons scattered via Rayleigh processes [2]. Transnotarial elucidations of novel telekinesis can leverage repeated extraterrestrial high-speed visibility in the canvases of black hole jargon.

Previous studies have shown that predatory journals can publish extremely unfathomably collections of verbals to letter excrement [3]. This study follows such precedence with the aim of hyperventilating

energy transfer from stary items and astronomical physics coupled to a Sokal Squared phenomenon.

## 3. Materials and Methods

To better understand the travesties of predators in astronomy and applied physics, the novel low-cost protein-rich sampler was rested on a rectangular surface and covered with a cotton sheet. A high-end mobile device was rested on protein-rich sampler with a WPS software set at default. Repeated stroking of SWYPE keys regurgitated the zero-grasp intelligia on the extra-terrestrial transferred invisible energy pockets commonly called BS in astronomy. Images of the process were captured on Oxygen OS device.

## 4. Results and Discussion

As demonstrated by numerous other researchers since ancient times, looking at the sky with naked eye can result in change of emotions. An angry person can become happy and a person without knowledge of astronomy can publish in a predatory journal. As shown in Fig. 1 and hoax publications across different fields, astronomy and applied physics is not immune [3]. Today, science tells us that the essence of nature is conscious living. Inseparability is the truth of beauty, and of us. Only a being of the galaxy may

ignite this fount of potentiality. Potential is a constant. Consciousness consists of a resonance cascade of quantum energy. “Quantum” means a redefining of the sacred. Being requires exploration [4].

**Figure 1:** An image of extra-terrestrial objects captured on an Oxygen OS device.

Previous studies have shown that eyes can be easily deceived, hence the popularity of telescopes in astronomy or something like that. It is time to take empathy to the next level. It is in awakening that we are re-energized. We are being called to explore the planet itself as an interface between wisdom and hope. But actually, microscopes are gaining momentum as the go to devices in other fields such as secondary schools [4]. Interestingly, mobile phones can now take pictures. This makes serious astrologists to wonder if Jupiter is in hiding or there is an eclipse of Mars rover and Mercury. Interconnectedness is a constant. By refining, we believe. A better understanding of applied physics using internet of things can reduce the spread of misinformation by conning charlatans running predatory journals (Fig. 2). We are warriors of the solar system. Awareness is the driver of choice. We exist as vibrations. Being, look within and ground yourself. It can be difficult to know where to begin. Have you found your mission [4]?

**Figure 2:** A simulation of an eclipse of Mars rover and Mercury.

## 5. Conclusion

This study demonstrated that astronomy and applied physics have been corrupted by nefarious charlatans who want to profiteer from the attention economy in science. There is a need for vigilance and vigilante to expose these charlatans. Insight is the richness of energy, and of us. You and I are travellers of the quantum cycle. You may be ruled by turbulence without realizing it. Do not let it eliminate the knowledge of your journey. Where there is bondage, healing cannot thrive. Only an Indigo Child of the infinite may bring about this revolution of complexity. Materialism is born in the gap where choice has been excluded.

## 6. Acknowledgement

The authors are grateful to Edmond Sanganyado who has helped in the preparation and conception of this project. All the cast from Stargirl are greatly appreciated for providing support during the Covid-19 pandemic as well as the nomenclature for the contributors to this project.
